

HOSPITAL DOCUMENT MANAGEMENT SYSTEM

CAPTURE

Easily scan and file documents using our simplified scanning solution with Optical Character Recognition that converts documents into text searchable PDF.

STORE

Efficiently store documents with this solution that supports any file type.

MANAGE

Have confidence that content is secure with the ability to set permissions and control the document

COLLABORATE

Share, Track, and Process Documents with the Work Group/s and Decision Maker/s.

ACCESS

Search, View, Approve, and Share files on the go. Get quick and convenient access anywhere at any time using any device and web browsers securely.

Hospital Document Management System
Capture and manage medical records and healthcare information to reduce costs and streamline operations.

Efficient information retrieval is vital in any industry, but for healthcare providers, it can be a matter of life and death. A misplaced patient record, chart, form or lab result can delay care when it is needed most.

Even when delays aren't life threatening, pausing to track down information from paper and computer files scattered throughout the healthcare institution takes away from quality time better spent providing patient care. With the Hospital Document Management System, you can capture and manage electronic healthcare records and other hospital records to reduce costs, improve patient care and streamline operations.
